

## **Aviation** *Facilities and Hangars*

Whether you need a small simple hangar or a large, complex multi-unit facility, a Robertson engineered steel building is an ideal solution because it is custom designed for your specific requirements.

To protect your aircraft investment from weather and ultraviolet light, count on Robertson Building Systems to meet your needs and budget. Our expertise in aviation buildings includes standalone and multi-unit projects, private and commercial hangars, T-hangars, and storage, maintenance, and repair hangars.

### **Count on Robertson's Experience with Aviation Facilities and Hangars to determine your exact requirements, including:**

- Type and number of aircraft that will be stored in your hangar now and in the future. This includes clear span requirements, tail heights, turning radii of tow vehicles used to move aircraft, and dimensions of your lifting, rolling, bi-fold, or stacking leaf hangar doors.
- Type of maintenance that will be performed in your facility: airframe and/or engine repair; systems repair; battery services; and interior finishes repair.
- Energy efficiency, including temperature and humidity control.
- Fire protection and alarm devices required.
- Office, lounge, and administrative areas.
- Warehouse space.
- Aesthetics to reflect your company's image.

## Advantages of engineered building systems will save you both time and money.

Whether you are a large company or a growing small business, a Robertson custom engineered building is an ideal solution. Your building will be designed for your specific requirements, whether it is a small, simple hangar or a large, complex facility.

Your Robertson Builder, highly skilled in engineered building systems, will ensure that construction is handled quickly and proficiently. Industry estimates indicate that engineered building projects take one-third less time to construct than traditional building projects, allowing you to occupy the building sooner. Your engineered steel building can also be designed to accommodate easy future expansion.

Aviation facilities and hangar construction is a large part of Robertson's business, so when it comes to designing your building, call us. We can provide a single source solution to deliver a complete turnkey project.
